SAILMAKING

We have been able to source some wonderful Lightweight Mylar film which is ideal for the smaller class of model. The weights can be mixed between Mains and Jibs to provide the perfect combination in all weights of wind. The material comes in 36um (micron) 50um and 75um. The lighter weights come in 600mm roll widths and the 75um in 83 mm width. If you want this posted we will send it in a strong mailing tube, but it will constitute an extra cost. Contact us for postage rates.

- 36um \$7.00 per metre
- 50um \$10.00 per metre
- 75um \$12.00 per metre

RABOESCH PROPELLERS

Please check the website for the latest price list as there have been some price adjustments. We have been able to hold our prices for the past three years but the international price of brass has forced Raboesch to increase their prices. Some prices have risen slightly, many remain the same and lots of the large sizes have actually reduced in price.

SPECIAL FLAGS

We are aware that many of our customers are building models of the old classic mahogany runabouts either as scratch projects or from kits. They make fabulous models whether working or for static display.

To assist them in providing that final, authentic, finishing touch, we have a range of logo flags from the world's most famous builders - Chris-Craft, Hacker Craft, Century Boats, Gar Wood and the Italian Riva. All are printed both sides on cotton fabric and will make any model look really special with that extra touch of class.
